

Installation Instructions For

Signs

Suspension Mounted Signs

Ecoglo exit signs are to be installed only where there will be sufficient natural or artificial light to keep them charged whenever the building is occupied.

Signs Suspension Mountined Signs

Mounting Location

- When installing the sign make sure it is parallel to the nearest horizontal building feature, so that it looks level to the eye.

Mounting Surfaces

- Use chain or wire from suitable anchor points on the building. Attach to the top 2 holes in the Ecoglo sign with key rings or D-shackles.
- If installed in locations where the sign may be blown around, attach 2 wires or chains to each of the top 2 holes in the Ecoglo sign. The wires or chains should be hung at an angle, for example from 4 points that mark out a 1 metre square.
